AUTOMATIC SLIDING GATES

Till date we have been successful in winning the faith of all clients in our technology and services. Our philosophy is to provide a quality product at a competitive price backed by the highest standard of service and total customer satisfaction.

- Sliding gate operator is our new developed product Integrated mechanical and electrical, ie, with PCB inside.
- Can be connected with alarm and sensor and button switch and loop detector.
- Mechanical limit switch (spring limit switch) or magnetic limit switch is optional Release key for power failure.
- Optional line control or remote control.
- Waterproof motor.
- Self-locking in closed position.
- Quiet and stable operation.
- Remote distance up to 70 meter.
- Color of base: Sliver white or Black.

Pak German Engineers team of trained and experienced technicians who can handle the installation of automatic sliding gates. They should ensure proper positioning, alignment, and integration with the motorized system, security features, and any automation or access control systems.

Project Solution

Capability:	Total solution for projects
Product Name:	Sliding Door Gates
Color:	Custom
Input Power:	220V 50HZ

AUTOMATIC SLIDING DOORS

Experience a new level of convenience and sophistication with our automatic sliding doors. They effortlessly open upon approach, ensuring hands-free access for a seamless entry. Our doors prioritize safety with advanced sensors, offer adjustable speed for efficient flow, and contribute to energy efficiency. Embrace the future of doorways with automatic sliding doors and elevate your space to the next level!

**Door Control Panel****Motion Sensors****Remote control**

● Features

- Weather resistance for outdoor applications.
- Anti-pinch and obstruction detection
- Advanced motion sensors for optimal operation.
- Seamless integration with existing access control systems.
- Automatic locking mechanism for added security.
- Weather resistance for outdoor applications.
- Programmable operating modes for customization.
- Emergency manual override capability.
- Multi-language user interface.
- Self-cleaning track system.
- Adjustable opening and closing speeds.
- Quick and efficient passage.

ELEVATORS AND ESCALATORS

Elevators and Escalators: Efficient, Safe, and Convenient

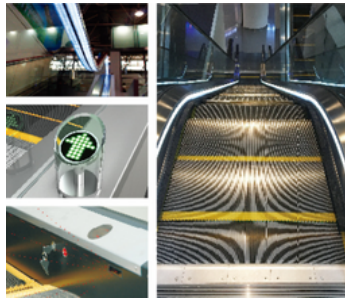

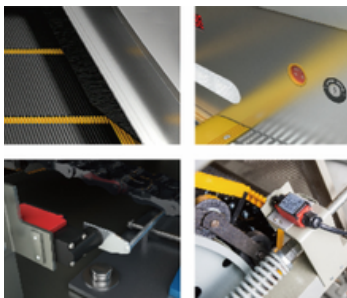

Are you looking to enhance the functionality and experience in your building? Look no further! Elevators and escalators are the answer you've been searching for.

Let us tell you why :

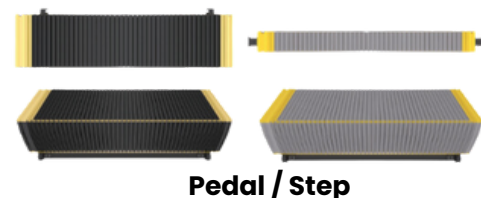

Elevators: Efficient and Accessible

- Smooth and efficient operation.
- High-speed performance for reduced wait times.
- Advanced safety features for passenger protection.
- Accessibility for individuals with mobility challenges.
- Intelligent destination control to optimize efficiency

Escalators: Convenient and Space-Efficient

- Convenient and time-saving transportation.
- Effortless movement with smooth and continuous steps.
- Safety mechanisms ensuring passenger security.
- Space-efficient utilization of vertical areas .
- Durability and reliability to withstand heavy foot traffic

AUTOMATIC TURNSTILE

Are you in search of a smart and efficient solution to manage access control in your facility? Look no further than our cutting-edge Automatic Turnstiles!

Let us tell you :

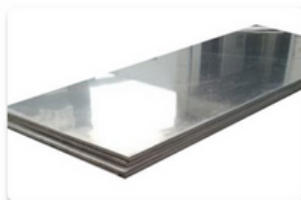

High-quality motor Servo motor, brushless motor, brush motor for option

Our turnstile are made of glossy stainless steel, let it to be rustless.

Our turnstiles are assembled with high-quality control board, let it have

Our turnstile house are made of thickness steel, let it to be strong and durable

⦿ Features

- Effortless access management
- Enhanced security measures
- Optimize traffic flow
- Customizable solutions
- User-friendly interface
- Low maintenance and high durability
- Integration capability with other security systems
- Data collection and analytics
- ADA compliance
- Energy efficiency
